

Advantage FAQ

Question

How does SmartTrack help me be more productive?

Answer

GPS1200's new SmartTrack measurement engine and antenna are perfectly matched for the best performance that leads to improved productivity. Through advances like:

- satellite acquisition within seconds,
- tracking in difficult conditions (e.g. low elevation satellites, amongst obstructions), and
- the suppression of multipath,

SmartTrack technology provides excellent measurements to the SmartCheck processing algorithms to ensure that more points are measured per day than ever before.
