

# Advantage FAQ

---

**Question**

What is X-Function?

---

**Answer**

X-function facilitates the Working Together of TPS and GPS instruments through harmonized design in all facets of the system.

With X-function, System 1200 sets a new standard in compatibility between high-end surveying products. Not only is the user interface and application software identical, exactly the same database is used for both TPS and GPS facilitates seamless data transfer between GPS and TPS saving time and money. The power concept for System 1200 is identical for TPS & GPS, use one charger to power the batteries required for a full days use of GPS & TPS. Easily and seamlessly exchange data between GPS, TPS & the office with a smart PC card. One office software package manages all of your data – System 1200 represents the complete package for surveying professionals.

**X-Function:**

- Same interface between GPS and TPS.
  - Same database between GPS and TPS.
  - Same memory cards between GPS and TPS.
  - Same battery charger for GPS and TPS.
  - Same office software (LGO) for GPS and TPS.
-
